

Mother Earth

Katharina Merkel

What is our earth like?

It's like a marble including
all colours of life.

The blue of the
ocean, the white
of the clouds,
the green of the plants,
the colourful of the
towns.

When you stand on top of a mountain, you
can see her wide spread wings,
but if you go outside, you notice them all as only
small little things.

What does that all mean to you, this beautiful air substance?

It includes your home and your future,
It wakes you to believe that there's always some-
thing worthy to live.

But how do we call this wonder of exist?

Mother Earth, to protect you
and help you wherever
you live!
